Submission from Frauen Aktion München

Munich, 5th April 2023

Frauen Aktion München, further called FAM, is a Group of political active women located in Munich, Bavaria, and its surrounding regions. Our Work includes the improvement of female rights in Bavaria, Germany. Female rights are dissolving, female spaces are opened for males as well. In Munich there is just one space remaining, where only women have access rights, called KOFRA¹. This space is under constant attack from the Left as well as the Green Party of the city council.

Munich's first ever Lesbian Center ² has been changed to a Queer center as well, so not only lesbians have access to this rooms, but also men who identify as lesbians, or so called non binary men, feeling to be partly female, partly male but biologically men.

Spaces for women are disappearing because public funds are retreated as soon as women claim rooms for female only.

FAM organized a demonstration for female rights in the week of international women's day on March 4th – this demonstration got massively disturbed by men, police was more or less helpless or not willing or unable to support the demonstration³ in a way that women could speak freely. It ended up with mostly men yelling „shut up haters“.

1. Restricted right to demonstrate:

The right to demonstrate is a constitutional right in Germany, GG Art 8 (1): All Germans have the right to assemble peacefully and unarmed without registration or permission. All over Germany Feminists cannot freely execute their right to demonstrate, because men keep disturbing these demonstrations while police, kind of helpless, let this happen.

2. Planned Self Determination Act:

This upcoming law will harden the situation for women and girls even more. The coalition partners of the German Federal Government want to ratify a self-determination law. This includes a procedure at the registry office, which makes changes to the sex entry in the civil status possible in principle by self-disclosure, an extended and sanctioned prohibition of disclosure and a strengthening of information and counselling services⁴.

3. Exchange of sex with “sex identity”:

In German there is no word for gender, instead a new word-creation is created to replace sex, the so called “sex identity” (“Geschlechtsidentität”). The category sex will disappear and will be replaced by “sex identity”. Each law shall be adapted to “sex identity”, it is even planned to change the German Constitution: Our Constitution (Art. 3 GG (3)) prescribes that “nobody is allowed to be discriminated because of his or her sex, ethnicity, race, language, home country neither origin, religious or political beliefs. Nobody is allowed to be discriminated because of his or her disability.” To all these criteria leading politicians of the governing coalition which consists in the Green party, the social-democratic party SPD, the liberal party FDP and even of the opposition, CDU/CSU want to add “sex identity”. This would mean practically: Everyone who “feels” female would have the same rights as born females. The state, obliged by constitution (Art. 3 GG (2)) to counteract any inequality between the sexes, would then be obliged to grant equality between the “sex identities”. This would make it nearly impossible to grant real equality between men and women. Because of the vagueness of the term “sex identity” even sexual deviances could be claimed to be part of the criteria based on which nobody is allowed to be discriminated. Such could be for example pedophilia: already an organization of pedophiles, the “krumme 13” has started a petition to add pedophilia to these criteria.

Individuals who feel a different gender than their sex will change their “sex identity” in Germany. Sex will be replaced by “sex identity” in each and every law. This means born girls and women disappear in German reality and Statistics.

4. Already the female statistics are adulterated:

Statistics are filled by “sexual identities” – the given Transsexual Law, TSG, allows men, under certain conditions, to change their legal sex to female. In opposite to most other countries in the world, Germany has a 3rd legal sex category (positive gender entry) for intersex people: we have male, female and divers.

Under self ID law males can receive a new social security number with a female code. The plan could be, once “sex identity” is introduced into our Constitution as well, that each and every “sexual identity” which is not male (female, nonbinary, without any sexual identity, genderfluid ...) will receive a social security number with a female code.

Germany’s Federal Office of Statistics uses the sex code of the social security number for all their statistics, forecast and so on. If every man can change his legal sex, this leads to completely wrong key figures and forecasts, expert opinions and measures against discrimination based on federal and state statistics already and even more in future times. Statistics about the crime rate, violence

⁴ <https://www.bmfsfj.de/resource/blob/199382/1e751a6b7f366eec396d146b3813eed2/20220630-selbstbestimmungsgesetz-eckpunkte-data.pdf>

against women, violence of women, women's sports, gender pay gap, retirement pensions, poverty, freedom of expression – all these will be adulterated, inequality between men and women can't neither be detected nor eliminated.

The change of the social security number is also retrospective, statistics of the past are not corresponding with the actual.

5. German Women's Council uses wrong Translation of CEDAW

The Deutscher Frauenrat, German Women's Council uses a wrong translation of CEDAW⁵, "Convention on the Elimination of All Forms of Discrimination Against Women" - instead of "women" they use "all women", which is a tricky inclusion of transsexual men and non binary men into womanhood. "Beseitigung jeder Form der Diskriminierung **aller** Frauen", correct is „Beseitigung jeder Form von Diskriminierung **von** Frauen“.

They also include "sex identity" – see above 3. Exchange of sex with "sex identity" – in the German CEDAW Translation, vocabular which is not even defined in German.

„um Diskriminierungen aufgrund des Geschlechts (sex) und der Geschlechtsidentität (sex identity)“

Which completely is not existing in entire CEDAW, and because it is a completely new word creation even in German it is not defined what it means.

The German Women's Council is an umbrella organization of 60 German organizations, which highly affects women's organizations. Once the German women's Council started using the term "sex identity", the use of this expression spread out like a bushfire in other women's organizations.

Women's organizations get in trouble nowadays, when they claim to work for women, instead of for all women, for female sex instead for "sex identity". All this without any legal definition or foundation what this "sex identity" might be.

6. Replacement of sexual orientation with "sexual identity":

Another highly irritating and problematic trend is the creation of another identity, which is "sexual identity" ("sexuelle Identität"). Sexual orientations are clear and well defined – we know heterosexuality, homosexuality and bisexuality.

The term "sexual orientation" is disappearing in Germany, instead of it "sexual identity" is used. "Sexual Identity" like "sex identity" is not defined. This means: Heterosexual men who "feel" they are women claim the identity "Lesbian". So they demand access to lesbian locations and want to force being part of lesbian sex life. They claim to have female genitals, which is in fact a "female penis". Lesbians are forced into conversion by this. Show me one lesbian who is willing to have intercourse with a man!

The current Government wants to include "sexual identity" in the German Constitution GG Art 3 , so no truly homosexual person is protected to conversion-claims of heterosexual men or women. Gay men are affected, since transsexual heterosexual women "feel" to be gay men

⁵ <https://www.frauenrat.de/cedaw-allianz/>

In Germany resistance is forming, organizations like LGB Alliance.⁶, LAZ Reloaded⁷, The Real Dyke March⁸, Just Gay⁹ are founded. They claim their rights as homosexual people. All these organizations are framed as right wing, as transphobe, Nazis. In fact they just claim that homosexuality means same sex attracted.

7. Conversion Treatment Protection Act:

In 2020 the Conversion Treatment Protection Act was released¹⁰. It was planned to protect homosexual people. It happened that also transsexual people got protected from conversion therapy. Therapist aren't allowed any more to question or to explore transsexual feelings of children. More and more girls claim to be transsexual/transgender, they often receive mastectomy and puberty blockers long before adulthood.

in the next step the current government has signed in their coalition agreement that even parents are forbidden to question their children's wish to change their gender. Parents shall fall under the Conversion Treatment Protection Act – "We will abolish the exceptions to punishment in Section 5, paragraph 2 of the law on protection against conversion treatments" page 122 Koalitionsvertrag, coalition agreement. This paragraph 2 rules penalties¹¹: (1) With imprisonment of up to one year or with a fine shall be imposed on anyone who, contrary to Section 2, conversion treatment is carried out. (2) Paragraph 1 shall not apply to persons who act as a guardian or legal guardian.

Once the government implement these additions, parents won't allowed to question the transsexual feelings of their children anymore. They are cut off from their parenting rights.

Already children go to court because parents and family do not accept their wish to receive puberty blockers or mastectomy. More and more children are taken away from their family and placed in institutions to receive the desired treatments.

8. Teachers position themselves against Self ID for Children:

In FAM group several teachers¹² are active. These teachers claim no child is born in the wrong body. In elementary schools and kindergarten children get introduced to the ideology they could be born in the wrong body. Long before children are aware what male female means they learn already. With the Self ID law children under age 14 will be able to get assigned to a different sex if parents perceive their children to be transsexual. Up from 14 with a judgment of the family court, if the parents don't agree.

The term "self-perceived sex identity" has already made it into the official "Guidelines for family and sex education in Bavarian schools" (again sex identity, vocabulary never defined what this shall be).

Again, a well-defined expression, here the medical diagnosis "transsexualism" gets replaced by the expression "sex identity" and "transidentity". Children learn they can have a "transidentity". To feel this brings a lot of recognition and attention. Often autistic children claim to have a "transidentity". Other medical diagnosis are set into the background when a child says it is transsexual. So urgently needed medical treatment is withheld, necessary treatments recede into the background because of Conversion Treatment Protection Act.

Good willing, but badly informed teachers, sometimes without agreement or even knowledge of the parents, treat the felt "transidentity" of the children as the real sex, thus support social transition of a child which mostly is not even aware what sex and sexuality really is. Because education is a federal matter, every state ("Bundesland") has its own education legislation. It is difficult to inform teachers all over Germany in an objective way about the problems and difficulties of the transgender concept of children "being born in the wrong body". Teachers in our organization try to inform the Bavarian authorities in an objective way and work on handouts for schools and authorities.

with kind regards
